

AdvancedWare is Pleased to Present AWReportBuilder for DataFlo - \$9,500

AWReportBuilder makes it easy for users to create their own Ad Hoc reports. DataFlo is a great ERP system but sometimes generating reports can be a challenge. The solution is AWReportBuilder from AdvancedWare.

AWReportBuilder is great for both IT Professionals and End Users. As an IT Professional, you can use AWReportBuilder's Graphical Interface to quickly and easily setup flexible Data Sources for Ad Hoc reporting. A Data Source defines related information from your DataFlo system (Customer Information, Supplier Information, etc). End Users can then use a simple Graphical Browser Interface to run Ad Hoc reports against this information.

It's fast and efficient – AWReportBuilder can run the Ad Hoc reports against the live data or against cached data that is updated periodically. Performance really counts when running Ad Hoc reports and AWReportBuilder delivers.

And talk about flexibility – AWReportBuilder lets users sort, filter, sub-total, export to Excel and more.

Like all AdvancedWare products, AWReportBuilder is a complete solution that comes with everything you Need to start generating reports. For the Turnkey Price of \$9,500, AWReportBuilder includes the following:

- Unlimited Users
- All installation and setup services
- Data Sources for the Customer & Supplier information
- IT training on building additional Data Sources for DataFlo
- End User training on how to build Ad Hoc reports

Graphical Browser Interface for Building Ad Hoc Reports
