AdvancedWare is Pleased to Present AWmReceiving for DataFlo - $8,500

AWmReceiving enables your company to use a Wireless Mobile Device to handle your DataFlo receiving functions in Real-Time. Using a graphical interface on the Wireless Device, the receiving process is handled through these simple steps:

- On the Wireless Device, enter (or scan) the purchase order to be received.
- In Real-Time, AWmReceiving shows open PO line items from the DataFlo system.
- Simply enter (or scan) the actual quantities you received, and AWmReceiving will automatically perform the receiving transaction in your DataFlo system and automatically prints out barcoded labels for the products being received.

Enter (or scan) the PO to be Received
