## AdvancedWare is Pleased to Present AWmWOPick for DataFlo - \$8,500

AWmWOPick enables your company to use a Wireless Mobile Device to efficiently pick the parts needed for a Work Order. And best of all, the transactions in your DataFlo system are performed by AWmWOPick automatically and in Real-Time. Using a graphical interface on the Wireless Device, picking the products for a Work Order is handled through these simple steps:

- Simply scan (or enter) the Work Order to be picked.
- In Real-Time, AWmWOPick will display from your DataFlo system the parts that need to be picked for that Work Order. The display also shows the inventory quantities you have for the parts and what bin locations they reside in.
- Simply enter (or scan) the actual quantities picked, and AWmWOPick will automatically update your DataFlo system in Real-Time.

### Scan (or enter) the Work Order to be Picked
