

AWSalesTax
\$9,500

AdvancedWare is Pleased to Present AWSalesTax for Epicor 9 - \$9,500

AWSalesTax fully automates the tax calculation process for your Epicor 9 system. Sales Taxes are constantly changing, which drives the need for an automated system that will always apply the correct tax to the sale. With AWSalesTax, the calculations are performed for you automatically whenever you enter a Sales Order into your Epicor 9 system. In fact, not only does AWSalesTax determine the correct tax, it also automatically creates the needed codes in the Epicor 9 system. What's more, AWSalesTax will automatically re-verify the rate at the time of Invoice so if the tax rate changes between the time you take the Order and when you Ship/Invoice the Order, the correct tax rate will be applied.

And best of all, with AWSalesTax, you don't need to pre-load or maintain any tables on your system because AWSalesTax uses Real-Time Web Services Technology to calculate the taxes. What this means is when you enter the Order or generate the Invoice in Epicor 9, AWSalesTax automatically does a Real-Time calculation to determine the correct tax rates.

Key Features of AWSalesTax:

1. All tax calculations are done in Real-Time via Web Services so there is no need to maintain/update tax tables on your system.
2. Tax calculations are done both at the time of entering an Order and re-verified at the time of Shipment/Invoice generation.
3. All of the required codes are automatically generated in the Epicor 9 System.
4. AWSalesTax works with any release of Epicor 9, even if you have customization.

Our Turnkey Approach: For the price of \$9,500, AWSalesTax provides you with everything you need to automatically calculate the correct sales tax for your Epicor 9 system. We include the installation and setup of AWSalesTax on your server and full integration to your release of Epicor 9, even if you have customization.

The Bottom Line: With AWSalesTax, you will be automatically calculating the correct sales tax when placing Orders in Epicor 9 and the tax calculations will be re-validated at the time of Shipment/Invoice.
