

AdvancedWare is Pleased to Present AWmInvCount for Epicor ERP 10 - \$8,500

With AWmInvCount, you can do all of your Physical Inventory and/or Cycle Count transactions electronically without the need for paper tags. Using a Wireless Mobile Device, AWmInvCount lets you scan (or enter) all the information and your Epicor ERP 10 system is automatically updated in Real-Time. Using a graphical interface on the Wireless Device, your Physical Inventory and Cycle Count transactions are handled through these simple steps:

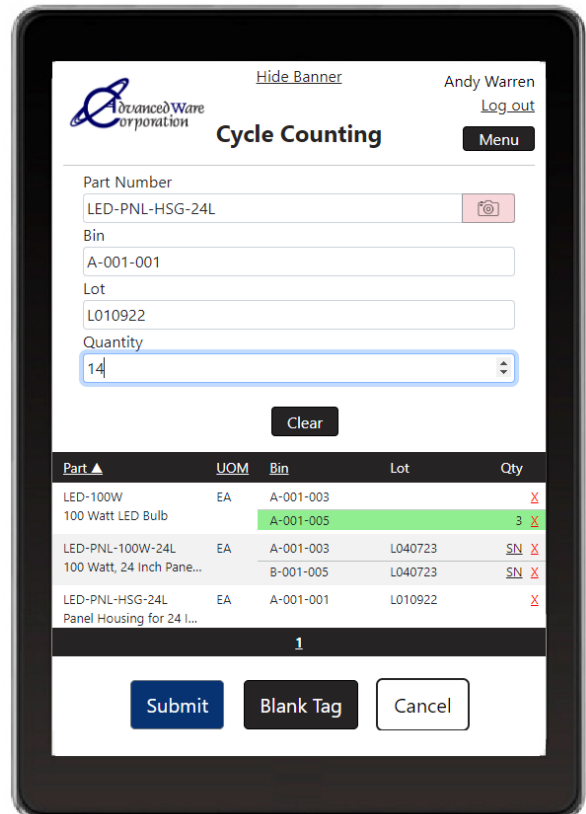

- **Tag Selection:** Scan or select the warehouse (and optionally the zone) where you will be counting. The system will automatically retrieve all of the outstanding Count Tags for the selected area.
- **Tag Counting:** Users will be presented with a screen showing the Parts that they need to count and the bin locations where the system anticipates these parts are located. Simply scan or enter the parts, bins and quantities and the counts are automatically recorded in your Epicor ERP 10 system.

Tag Selection

The screenshot shows the 'Cycle Counting' screen. At the top, there is a 'Hide Banner' link, the user name 'Andy Warren', and a 'Log out' link. Below this is a 'Menu' button. There are three checkboxes: 'Manual Entry', 'Recount Tags', and 'Full Physical'. The main section is titled 'Count Tags for Area' and contains two dropdown menus: 'Warehouse' (set to 'Evanston - Main (EVN)') and 'Zone' (set to 'Zone A'). Below these is a 'Select Tags' button. At the bottom, there is a section 'Enter a specific tag' with a 'Tag Number' input field.

Tag Counting

The screenshot shows the 'Tag Counting' screen. It has the same header as the previous screen. Below the header, there are input fields for 'Part Number' (LED-PNL-HSG-24L), 'Bin' (A-001-001), and 'Lot' (L010922). A 'Quantity' dropdown is set to '14'. There is a 'Clear' button. Below the inputs is a table of parts:

Part	UOM	Bin	Lot	Qty
LED-100W 100 Watt LED Bulb	EA	A-001-003		3
LED-PNL-100W-24L 100 Watt, 24 Inch Pane...	EA	A-001-003	L040723	SN
		B-001-005	L040723	SN
LED-PNL-HSG-24L Panel Housing for 24 l...	EA	A-001-001	L010922	

At the bottom of the table, there is a '1' and three buttons: 'Submit', 'Blank Tag', and 'Cancel'.

Our Turnkey Approach: For the price of \$8,500, AWmInvCount lets your company handle Physical Inventory and/or Cycle Counts in the Epicor ERP 10 system in Real-Time using a Wireless Mobile Device. And best of all, AWmInvCount works with any release of Epicor ERP 10, even if you have customization.
