

Delivering Exceptional Services & Software Every Time

AWmWOMaterial&Labor
\$8,500

AdvancedWare is Pleased to Present AWmWOMaterial&Labor for MANAGE 2000 - \$8,500

AWmWOMaterial&Labor provides a very efficient way of handling Work Order Material Movements and Labor Tracking for your MANAGE 2000 system. With AWmWOMaterial&Labor, your company will be able to use a Wireless Mobile Device (or PC with scanner) to handle these transactions and your MANAGE 2000 system will automatically be updated in Real-Time.

AWmWOMaterial&Labor provides a simple graphical interface on the Wireless Device, which enables your employees to scan or enter any information. With AWmWOMaterial&Labor, your information accuracy is much higher. And since all transactions are recorded in Real-Time, the system always reflects the true current status. Imagine the efficiencies gained in the Labor Tracking area by no longer having to fill out and manually key in paper time cards. Also, think about how streamlined your WO Material Movements will be when you no longer have to manually track each movement and then key it back into the system.

Our Turnkey Approach: For the price of \$8,500, AWmWOMaterial&Labor allows your company to perform the WO Material Movement and Labor Tracking functions in the MANAGE 2000 system in Real-Time using a Wireless Mobile Device (or PC with scanner). And best of all, AWmWOMaterial&Labor works with any release of MANAGE 2000, even if you have customization.
