

Delivering Exceptional Services & Software Every Time

AWmWOMaterial&Labor
\$8,500

AdvancedWare is Pleased to Present AWmWOMaterial&Labor for ManFact - \$8,500

AWmWOMaterial&Labor provides a very efficient way of handling Work Order Material Movements and Labor Tracking for your ManFact system. With AWmWOMaterial&Labor, your company will be able to use a Wireless Mobile Device (or PC with scanner) to handle these transactions and your ManFact system will automatically be updated in Real-Time.

AWmWOMaterial&Labor provides a simple graphical interface on the Wireless Device, which enables your employees to scan or enter any information. With AWmWOMaterial&Labor, your information accuracy is much higher. And since all transactions are recorded in Real-Time, the system always reflects the true current status. Imagine the efficiencies gained in the Labor Tracking area by no longer having to fill out and manually key in paper time cards. Also, think about how streamlined your WO Material Movements will be when you no longer have to manually track each movement and then key it back into the system.

Initially Clocking In

The screenshot shows the 'Labor Tracking' app interface. At the top, it displays the date and time: '7/2/2019 - 03:28 PM'. Below this, the 'Employee ID' is '9114' and the name is 'Michael Jordan', with a 'Cancel' button. A blue bar labeled 'Start New Job' is present. The form includes fields for 'Work Order' (AW1), 'Part Number' (PARTA), 'Description' (PARTA Description), and 'Operation' (700). At the bottom, it says 'SMALL CELL 1' and has a 'Clock In' button.

Recording Completion Quantity

The screenshot shows the 'Labor Tracking' app interface for recording completion. It has the same header as the previous screen. Below the 'Employee ID' and name, a blue bar labeled 'Job Completion' is shown. The form includes fields for 'Work Order' (AW1), 'Part Number' (PARTA), 'Description' (PART Desc), 'Operation' (700), 'Open Qty' (68), and 'Completed Qty' (5). There are also fields for 'Scrap Qty' and 'Scrap Code' (with a dropdown menu labeled 'Scrap Codes').

Our Turnkey Approach: For the price of \$8,500, AWmWOMaterial&Labor allows your company to perform the WO Material Movement and Labor Tracking functions in the ManFact system in Real-Time using a Wireless Mobile Device (or PC with scanner). And best of all, AWmWOMaterial&Labor works with any release of ManFact, even if you have customization.
