# AdvancedWare is Pleased to Present AWCreditCard for UniVerse and UniData - $5,500

Fully automated and secure processing of Credit Card transactions right from within your UniVerse or UniData system is now available with AWCreditCard. When you enter an Order into your UniVerse or UniData system, AWCreditCard will automatically validate the Card Information and perform the Authorization Transaction for the amount of the Order. The Authorization Transaction reserves the funds against the Card so that the Card can be charged when you Ship/Invoice the products. When you do the Shipment/Invoice transaction in your UniVerse or UniData system AWCreditCard will automatically perform the Capture Transaction which charges the Card for the actual Invoice amount.

AWCreditCard performs these functions without ever storing any Credit Card information which is critical for PCI Compliance. Also, you have many choices when it comes to Credit Card processors such as Authorize.NET, Chase Paymentech, CyberSource, PayPal, etc. AWCreditCard works with all of them so you can decide on the Credit Card processor that has the best rate and works the best for you.

Order Processing
UniVerse / UniData
