

Delivering Exceptional Services & Software Every Time

AdvancedWare is Pleased to Present AWValidateAddress for U2 - \$3,500

The AWValidateAddress solution will make sure you have valid customer addresses in your UniVerse/UniData system.

Save Money – No more costly shipments being returned and having to be re-shipped due to invalid addresses.

Save Time – AWValidateAddress is fully automated with UniVerse and UniData and works in Real-Time. Your users don't need to change anything because "behind the scenes" AWValidateAddress will automatically validate the Customer Addresses entered into your UniVerse or UniData System. If there is any problem with the address entered the system will not only let the user know but it will display on the screen the recommended changes to the address.

Increase Customer Service – With AWValidateAddress your Customer Service Level will increase because you will no longer have shipments returned causing delays to your customers. In today's world, customers expect technology like this to get it right the 1st time!

AWValidateAddress works for addresses in the United States and Canada and there is nothing you have to load or maintain because it uses Web Services Technology.

The screenshot shows a software window titled "Enter Ship-To Information" with a menu bar (File, Displays, User Options, Go To, Help). The form contains the following fields:

- Ship To Customer: 5025
- Ship Name: AdvancedWare Corporation
- Ship-To Address: 13844 Alton Parkway, Ste 136
- Address Line 2: (empty)
- Address Line 3: (empty)
- City/Town: Irvine
- State/Province: NY
- Post Code: 92618
- County: (empty)
- Country: US USA
- Residence:
- Insurance:
- Ship Contact: (empty)
- Contact Telephone: (empty)
- Inside/Outside City: (empty)
- GeoCode: (empty)
- GeoCode Override: (empty)
- Tax Area: (empty)

On the right side of the form, there are four buttons: F2-Accept, F5-Calc Geo, F7-Vertex Info, and F9-MA Entry. At the bottom of the window, a message box states: "This address is not valid. Suggested Correction(s): State (CA)". A "Continue" button is located below the message box.

AWValidateAddress
automatically determines that this address is not valid due to an incorrect state and informs the user.

Our Turnkey Approach: For the price of \$3,500, AWValidateAddress includes everything needed for your company to be up and running live. We include the installation and setup of AWValidateAddress on your system and AWValidateAddress works with any release of UniVerse or UniData.

The Bottom Line: With AWValidateAddress, your UniVerse/UniData Customer Addresses will be right every time.
