AWForms

\$6,500

## AdvancedWare is Pleased to Present AWForms for DataFlo - \$6,500

DataFlo users can now say goodbye to the costs, hassles and functionality limitations of outdated forms solutions (or heaven forbid, pre-printed forms). With AWForms from AdvancedWare, you can easily email (both PDF & Word formats), fax, print, and view on a PC screen any of your business forms.

### Features of AWForms:

1. AWForms utilizes the printing engine in Microsoft Word so any printer (Network or attached to your PC) works great. The graphics are in crisp and clear colors. AWForms supports both landscape and portrait style forms.
2. AWForms can be automatically emailed (in both PDF and Word formats) and/or faxed with automatic logging and notification and/or archived. You can even "mix and match", so if your customer wants the forms automatically emailed to them but you want your internal copies automatically archived, AWForms has this built in.
3. Making changes is easy with AWForms because there are no complex scripting languages to learn. In fact, you actually use Word to make changes to the form templates such as fonts, colors, graphics, etc. With AWForms, you will be making these types of changes to your forms in minutes instead of hours or days.
4. AWForms supports printing of bar codes (including 2 dimensional bar codes on any of the forms).
5. AWForms will run on any release of DataFlo.

One of the great features of AWForms is the ability to view the actual form on the screen, see example below:

**Our Turnkey Approach:** For the price of \$6,500, AWForms includes the combination of products and services needed for your company to be up and running live.

**The Bottom Line:** With AWForms, you will have the ability to automatically email, archive, fax, print and view your DataFlo form documents.

To arrange for a demonstration or to order your copy of AWForms please give us a call at (949) 609-1240
