AdvancedWare is Pleased to Present AWmJobPick for Epicor ERP 10 - \$8,500

AWmJobPick enables your company to use a Wireless Mobile Device to efficiently pick the parts needed for a Job. And best of all, the transactions in your Epicor ERP 10 system are performed by AWmJobPick automatically and in Real-Time. Using a graphical interface on the Wireless Device, picking the products for a Job is handled through these simple steps:

- Simply scan (or enter) the Job to be picked.
- In Real-Time, AWmJobPick will display from your Epicor ERP 10 system the parts that need to be picked for that Job. The display also shows the inventory quantities you have for the parts and what bin locations they reside in.
- Simply enter (or scan) the actual quantities picked, and AWmJobPick will automatically update your Epicor ERP 10 system in Real-Time.
