

Delivering Exceptional Services & Software Every Time

AWReportBuilder
\$9,500

AdvancedWare is Pleased to Present AWReportBuilder for UniVerse and UniData - \$9,500

AWReportBuilder makes it easy for users to create their own Ad Hoc reports. UniVerse and UniData are great ERP systems but sometimes generating reports can be a challenge. The solution is AWReportBuilder from AdvancedWare.

AWReportBuilder is great for both IT Professionals and End Users. As an IT Professional, you can use AWReportBuilder's Graphical Interface to quickly and easily setup flexible Data Sources for Ad Hoc reporting. A Data Source defines related information from your UniVerse or UniData system (Customer Information, Supplier Information, etc). End Users can then use a simple Graphical Browser Interface to run Ad Hoc reports against this information.

It's fast and efficient – AWReportBuilder can run the Ad Hoc reports against the live data or against cached data that is updated periodically. Performance really counts when running Ad Hoc reports and AWReportBuilder delivers.

And talk about flexibility – AWReportBuilder lets users sort, filter, sub-total, export to Excel and more.

Like all AdvancedWare products, AWReportBuilder is a complete solution that comes with everything you Need to start generating reports. For the Turnkey Price of \$9,500, AWReportBuilder includes the following:

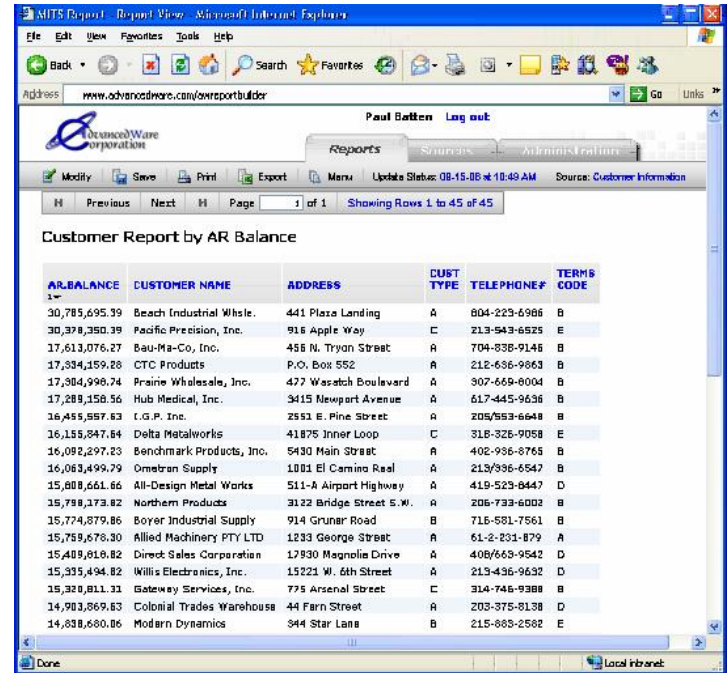

- Unlimited Users
- All installation and setup services
- Data Sources for the Customer & Supplier information
- IT training on building additional Data Sources for UniVerse or UniData
- End User training on how to build Ad Hoc reports

Our Turnkey Approach: For the price of \$9,500, AWReportBuilder includes all products and services needed for your company to be up and running live. We include the installation and setup, provide you with Customer and Supplier Data Sources, and train your Company on how to use the solution (both IT and End Users).

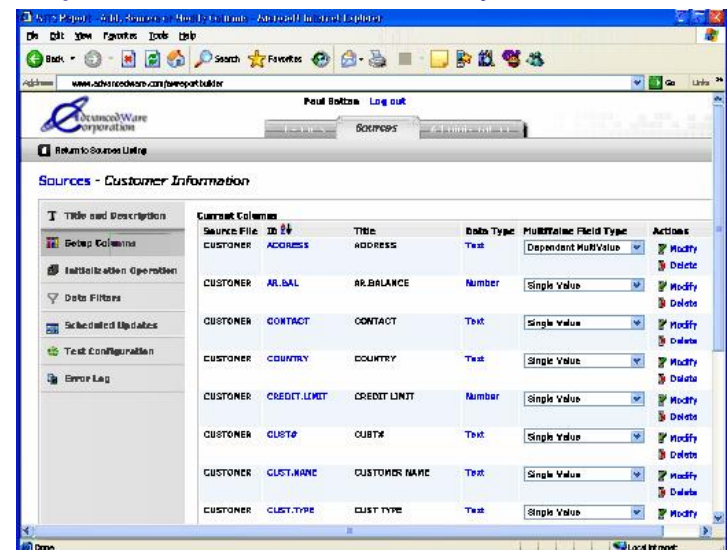

The Bottom Line: With AWReportBuilder Ad Hoc Reports for UniVerse and UniData is a snap.
